SOME SPECIAL

BARGAINS

For Autumn 1929

Selected from our complete lists.

3

THE PURPOSE OF THIS BOOKLET is not to list everything we can furnish—but only a few items that we think are of peculiar interest at this time; either specially advantageous prices, or particularly valuable kinds of hardy planting material. For a more complete list write for our 1929 SHORT GUIDE or send us your requirements and we will quote prices. As to smaller sizes, a complete list is pasted inside the Back cover of this Booklet.

KELSEY NURSERY SERVICE

Fifty Church Street NEW YORK CITY

Member American Association of Nurserymen

Kelsey Nursery Service

- 1. We furnish high quality stock. Kelsey Nursery stock is grown where it grows best; always, of course, with regard to shipping convenience. Of more than seventy nurseries with over twenty thousand acres of stock we select the nearest nursery growing the material of the quality and grade you may want.
- 2. We furnish our stock at the lowest prices made possible by mass production. Prices of nursery stock vary greatly. One nursery grows stock on land worth, say, \$4,000 or \$5,000 per acre. The stock is no better than that grown at a nearby nursery where land is worth perhaps \$400.00 per acre. Nature has no partiality in this respect. We are, therefore, enabled to sell excellent stock at very low prices.
- 3. We are an entirely responsible source of supply. Established Fifty Years ago, in 1878, we still have among our customers many who have been patrons for forty years or more. In all our dealings we are always willing to make things right on any errors or just causes for complaint.
- 4. Our Guarantee—Stock to be in good condition when furnished. We will, however, replace any and all losses at half price.
- 5. Scarce and rare varieties: Why look through a dozen nursery catalogues for them? Send us your list and we will quote promptly. This Short Guide is necessarily confined to standard varieties, but with our facilities we can furnish almost any variety or size grown in the United States.
- 6. The policy of this Company is to make and keep good will by careful and prompt service.

PRICES—net, packing at cost. Five will be supplied at the 10 rate, 25 at the 100, and 250 at the 1000 rate.

Claims for errors or shortages to be made within ten days.

Hedge Aristocrats

EVERGREENS form a living wall to protect you from wind and weather, as well as to screen out undesirable views. Yet they are effective all winter long. Plant in late August and September and secure this effect during the coming cold season. They can be planted in small sizes at little cost, or large trees can be set out to give immediate results.

Arbor Vitae

American—A narrow pyramidal tree to 15 or 20 feet. Dark green foliage. A popular hedge tree. We have many sizes in stock—here are a few:

| | | | (10) | (100) | (1000) |
|----|----|----|-----------|----------|---------|
| 8 | to | 12 | inches X | - 10.00 | 80.00 |
| 12 | to | 18 | inches XX | - 20.00 | 150.00 |
| 2 | to | 3 | feet B&B | - 150.00 | 1250.00 |

Pyramidal—A dense pyramid with light green foliage. Superior in growth and appearance to the above and does not grow ragged in old age.

| 12 | to | 15 | inches | X | 31.00 | 295.00 |
|----|----|----|--------|----------|--------|--------|
| 10 | to | 12 | inches | XX | 32.00 | 300.00 |
| 18 | to | 24 | inches | B&B24.00 | 200.00 | |

(Write for prices on other sizes)

Japanese Cypress (Retinospora)

Plumosa and Plumosa Aurea—A pyramidal tree to 15 feet. The first with green, and the second with golden tipped foliage.

| 10 | to | 12 | inches | XX | | 50.00 | 395.00 |
|----|----|---------|--------|-----|-------|--------|--------|
| 18 | to | 24 | inches | В&В | 20.00 | 185.00 | |

(Larger sizes on request)

Obtusa—A large tree of delicate appearance, but entirely hardy. Good grower. Makes a fine dense hedge.

8 to 10 inches X 9.00 75.00

Rooted Cuttings of the above, as well as Pisifera, Pisifera Aurea, Squarrosa Veitchii, Filifera, etc., listed in the green price list at the back of the book.

Other evergreens famous for hedge purposes include the Hemlock, Boxwood, Pines, Spruces and Yews—all of which will be found priced elsewhere in the book. Write us in detail about your hedge problems and we will advise.

Some Amazing Prices

BY special arrangement we offer the entire production of a large nursery in Maine specializing in Evergreen seedlings and small transplants for large Forestry plantings. This stock is exceptionally hardy on account of its Northern origin. The prices are offered with a view to enabling large areas to be reforested with minimum expense.

These prices stand comparison anywhere:-

Norway Spruce (Picea excelsa)

| 2 year seedlings (2-0) | 5.00 |
|--------------------------|-------|
| 3 year seedlings (3-0) | |
| 3 year transplants (2-1) | |
| 4 year transplants (3-1) | 12.00 |
| | |

White Spruce (Picea alba)

| 3 | vear | transplants | (2-1) | | 10.50 |
|---|------|-------------|-------|-------|-------|
| | | | | ••••• | |
| 4 | vear | transplants | (3-1) | | 12.00 |

Scotch Pine (True Riga variety)

| 3 year transplants | (2-1) | 12.00 |
|--------------------|-------|-----------|
| 4 year transplants | (3-1) | 14.00 |

Red Pine (Pinus resinosa)

| 3 | year | seedlings | (3-0) | • | 6.00 |
|---|------|-------------|-------|---|-------|
| 4 | year | transplants | (3-1 |) | 16.00 |

White Pine (Pinus Strobus)

(New England only)

| 9 | | | (O A) | | 6.00 |
|-----|------|------------|----------|---|-------|
| - 0 | year | seedings | (3-0) | | 0.00 |

| 4 | vear | transplant | S (3-1 |) | 12.00 |

See prices on other sizes and additional varieties in the green price list at the back cover.

Large Transplants at Low Cost

WHEN rigid economy is not essential, and time is to be considered, it is desirable to plant the largest size of evergreen that can be obtained in the Forestry or Lining-out grade, and at Forestry prices. We specialize in this particular size of once or twice transplanted stock from ten to twenty-four inches. It is shipped without ball of earth, safely, and the enormous cost of freight and express charges are almost entirely obviated, since they weigh little. A full list will be found in the back cover.

The Red (Norway) Pine

ABSOLUTELY hardy and more free from insect pests than any other large evergreen. In addition, it is a fast grower, makes a shapely tree and thrives on a wide variety of soils. Perhaps the best and most popular tree for all purposes. We have some exceptional bargains to offer.

| 12 to 18 inches once transplanted | 10.00 | 80.00 |
|------------------------------------|---------|---------|
| 12 to 15 inches twice transplanted | 15.00 | 125.00 |
| 2 to 3 feet B&B | .190.00 | 1500.00 |
| 3 to 4 feet B&B | .225.00 | 2000.00 |

We also offer a special size for rough screens, where specimens are not desired. They are good thrifty trees, evenly branched, but not lower than three feet from the ground. Many times transplanted, balled and burlapped, we offer these 8 to 10 feet in height in carload lots at \$750. per 100. We estimate about 100 in a car.

The Riga Scotch Pine

This has long been known among foresters as a type altogether superior to ordinary Scotch. It never makes a straggly growth, but is clean and straight. Needles do not turn yellow in spring. Branches are decidedly more red. It is very long lived. This tree we are offering for the first time in United States—all grown from selected seed from the Gulf of Riga district.

| 3 year old transplants | $\frac{(100)}{2.00}$ | 12.00 |
|------------------------|----------------------|------------------|
| 4 year old transplants | 2.50 | |
| 12 to 18 inches X | $8.00 \\ 10.00$ | $60.00 \\ 80.00$ |

When Winter Winds Blow

THE Pine screen—or just two or three specimens on the exposed corner—form a living protection: Specially designed by nature to withstand heavy winds and cold weather, they are invaluable for this purpose. Besides Red and Riga Pine offered on the opposite page, many varieties will be found in the green price list at the back. The following two varieties are adapted for seashore planting.

Japanese Red Pine

A large spreading tree with long, bright green needles. It will stand planting very close to the sand and salt, and makes a nice contrast to the Austrian Pine, generally used for such situations.

| | | | | (10) | (100) | (1000) |
|----|----|----|----------|-------|--------|--------|
| 10 | to | 18 | inches X | | 8.00 | 60.00 |
| 3 | to | 4 | feet B&B | 50.00 | 390.00 | |

Austrian Pine

The bushiest and shapeliest of the Pines. A fine lawn specimen or a good forestry variety. Makes a splendid screen close to the seashore. Hardy and healthy. A good grower. The photograph to the right is of a tree 4 to 5 feet in height. Note the shapely form.

| 10 | to | 12 | inches | XX | | | 18.00 | 150.00 |
|----|----|----|--------|-----|---|-------|--------|--------|
| 12 | to | 18 | inches | XX | | | 30.00 | 250.00 |
| 18 | to | 24 | inches | B&F | 3 | 25.00 | 200.00 | |
| 2 | to | 3 | feet B | &Β. | | 30.00 | 250.00 | |

Scotch Pine (Pinus Sylvestris—the ordinary type of this species.)

| 12 to 18 inches X | 6.00 | 30.00 |
|-------------------|--------|---------|
| 4 to 5 feet B&B | 275.00 | 2500.00 |
| 5 to 6 feet B&B | 385.00 | 3500.00 |

Mugho Dwarf Pine

This splendid dwarf is dense and low spreading. Absolutely hardy.

| 8 | to | 10 | inches | X | | 15.00 | 100.00 |
|----|----|----|--------|-----|-----------|--------|--------|
| 12 | to | 15 | inches | В&В | 12.50 | 100.00 | 900.00 |
| 15 | to | 18 | inches | В&В | 18.00 | 150.00 | |
| 18 | to | 24 | inches | B&B | 25.00 | 195.00 | |

The Glory of Firs

SOFT, lustrous needles - longer than with the Spruces - give these majestic trees a beauty all their own. We can offer nearly the best varieties in many sizes, but a few are specially noted on this page. They are all entirelv hardv and fairly fast growing.

Silver Fir (Concolor)

Silvery or Blue-green Needles—Dense pyramidal shape. Makes a splendid tree for massing or for single specimens.

| | | | | _ | (10) | | (1000) |
|----|----|----|-----------|---|-------|-------|--------|
| -8 | to | 12 | inches XX | | | 25.00 | 200.00 |
| 12 | to | 15 | inches XX | | | 35.00 | 325.00 |
| 15 | to | 18 | inches XX | - | | 50.00 | 400.00 |
| 2 | to | 3 | feet B&B | | 60.00 | | |

(Smaller and larger sizes on request)

Douglas Fir (Pseudotsuga)

Very dense, compact foliage of dark green. Valuable as a forestry tree on good land, and a fine lawn subject.

| 12 | to | 18 | inche | es XX | | 35.00 | 300.00 |
|--------|----|----|-------|-------|-----------|--------|--------|
| 18 | to | 24 | inche | es XX | | 60.00 | 500.00 |
| 2 | to | 3 | feet | B&B | 25.00 | 200.00 | |

(Smaller and larger sizes on request)

Balsam Fir

The famous "Balsam" tree that gives its characteristic clean fragrance to the Northwoods. A good tree for damp land. It grows broadly pyramidal with dark green needles.

| 10 | to | 16 | inches | X | | 15.00 | 100.00 |
|----|----|----|--------|-----|------|--------|--------|
| 12 | to | 18 | inches | B&B | | 65.00 | |
| 18 | to | 24 | inches | В&В | | 130.00 | |

(Smaller and larger sizes on request)

European Silver Fir (Pectinata)

A fine silver-leaved type. Hardy and reliable. Good shape.

8 to 10 inches X 12.00 100.00

A complete list of smaller sizes of evergreens will be found pasted inside the back cover.

Consider the Spruces

SPRUCE is still the best forestry subject for pulp-wood cutting. It makes a splendid lawn tree for the first fifteen years or so, but tends to lose its lower branches in later years. Prices, however are so low on this genus, in the commoner varieties, that it will probably continue popular.

Norway Spruce Thoroughly hardy, Norway Spruce is perhaps one of the two most popular subjects for reforestation. It is widely used for Christmas Tree purposes. Dark shiny needles. Thrives in any good soil and is an excellent variety for underplanting in shady woods. The fast-

A Koster Spruce Planting

est growing Spruce. We offer a complete list from seedlings to specimens—a few on this page.

| 18 to 24 inches | BB | 18.00 | 150.00 | | | | | | |

White Spruce

A shapely pyramidal tree, quick growing. In New England and cool climates generally, a more satisfactory tree than Norway Spruce. With its frosty green, dense, unique foliage, it is coming into favor for Christmas Tree planting. In forestry, it makes good pulp wood and timber. At maturity, it reaches a height of fifty to sixty feet and is straight and shapely. Much better specimen than the Norway, on account of its denser form. Write for prices on sizes not noted here.

| | | - | | | (10) | (100) | (1000) |

| 2 | to | 3 | feet B&F | 3 | 20.00 | 175.00 | |

Sun-Baked Slopes

CAN be successfully covered with evergreens. Junipers are the best type. As a family they prefer dry sunny locations and will thrive where many another evergreen will burn. A large assortment of shapes and colors is available. We do not pretend to list here more than a few items that we particularly recommend. Write us your problem, or advise us just what variety and size you want, and we will promptly quote.

Pfitzer Juniper

The most popular, and rightly so. It is a glaucous, grey-green, dense vase-shaped bush about 5 feet high at maturity and as many wide. It stands successfully the poorest of city conditions, and is one of the very few evergreens that smoke and gas will not kill.

| | | | | | (10) | (100) | (1000) |

Evergreens in the Shade

MANY people think evergreens cannot be grown in dense shade—the North side of the house—under woods, etc. But there are some varieties particularly adapted for this purpose—chiefly the Hemlock and the Yew, although Rhododendrons and Laurel succeed equally well.

Hemlock (Tsuga)

The American Hemlock is a superb tree with drooping, spreading foliage of dark green—very soft in effect. It is hardy in absolutely every respect save one, it must be protected from prevailing winds. We can furnish single specimens or carload lots at surprisingly low prices in all sizes. But for those wishing to use smaller trees, we offer two bargains for immediate order.

| | | | | | (100) | (1000) |
|----|----|----|--------|----|-------|--------|
| 4 | to | 8 | inches | X | 10.00 | 60.00 |
| 10 | to | 15 | inches | XX | 50.00 | 395.00 |

Yew (Taxus)

Japanese Yew (Cuspidata)

Hardy and slow growing, a spreading graceful tree, stands wind and cold and dense shade.

| 8 | to | 12 | inches X | 45.00 | 400.00 |
|---|----|----|----------------|-------|--------|
| 8 | to | 12 | inches XX | 60.00 | 500.00 |
| 2 | to | 3 | feet—\$8. each | | |

American Yew (Canadensis)

A low bush three to four feet high, but spreading arched branches that give the effect of a graceful fern. Crimson berries in winter.

| 7 | to | 9 | inches X | | 21.00 | 200.00 |
|----|----|----|------------|------|-------|--------|
| 18 | tο | 24 | inches_\$1 | each | | |

(Other varieties and sizes of Yew and Hemlock are available in carlot quantities—write for prices)

Flowering Evergreen Shrubs

FOR winter cheer and summer beauty and fragrance we offer the following outstanding varieties. Not only remaining green through the winter, this class of planting material furnishes a superb display of bloom.

Daphne Cneorum (Garland Flower)

The most delightful of the dwarf evergreen shrubs. A mass of fragrant pink blooms in May, which continue sparsely through the summer, and then in September it again bears a profusion of blooms. The fact that it blooms twice during the season make it doubly desirable. It thrives in any good soil and likes full sun.

| | | | | (Each) | (10) | (1000) |
|----|----|----|--------|----------|-------|--------|
| 6 | to | 8 | inches | 1.00 | 9.00 | 75.00 |
| 8 | to | 10 | inches | 1.25 | 12.00 | 95.00 |
| 10 | to | 12 | inches | 1.50 | 14.00 | 125.00 |
| 12 | to | 15 | inches | 2.25 | 20.00 | 190.00 |

Azalea Hinodigiri

(Japanese Evergreen Azalea)

With its brilliant crimson flowers in early Spring this is the finest of the evergreen Azaleas. Should be planted in a protected position.

| 6 | to | 8 | inches | 1.80 | 15.00 | 135.00 |
|----|----|----|--------|----------|-------|--------|
| 8 | to | 10 | inches | 2.00 | 18.00 | 150.00 |
| 10 | to | 12 | inches | 2.50 | 22.00 | 190.00 |
| 12 | to | 15 | inches | 3.50 | 33.00 | 300.00 |

American Holly (Ilex Opaca)

The well loved Christmas Holly. With its bright red berries and dark lustrous green leaves it is a beautiful all year round shrub. When transplanting the plants should be defoliated, remove all leaves with a sharp knife being careful not to destroy buds which are at the base of leaf stalk.

| 12 | to 15 inches | 2.00 | 12.00 | 100.00 |
|----|--------------|------|-------|--------|
| 18 | inches | 2.50 | 16.00 | 150.00 |
| 2 | feet | 3.50 | 25.00 | |

Rhododendron and Laurel

THE finest of the broadleaved evergreens, and contrary to popular opinion easily and safely transplanted. An ACID SOIL is their only necessity, given this they will thrive in sun or shade and require practically no further care.

Small Sizes for Economy

Hardy Hybrid Rhododendrons

The Hybrids are noted for the beauty, richness and large size of their flowers, and their variety of color. For these reasons they add greatly to the attractiveness of any Rhododendron planting.

The plants priced below are well shaped and with flower buds, they are now in the open field and absolutely hardy. They will be dug with a fine ball of fibrous roots for safe transplanting.

Amphion—Clear pink with white eye, large bloom. Catawbiense Album—White, fine foliage. Catawbiense Grandiflorum—Dark rosy lilac. Mrs. C. S. Sargent—Deep rose shading to red. Roseum Elegans—Clear rose, compact grower.

Will furnish $50\,$ plants, $10\,$ each of any five of the above varieties, at the $100\,$ rate.

Flowering Dogwood (Cornus)

SPRING would lose much of its beauty were it not for this species. The large showy flowers in massed effect make a sight never to be forgotten.

Note that we can furnish small sizes as well as large. This is true of all other varieties on these pages. They are listed and priced in the green folder pasted in the back of the book, under the heading "Deciduous Trees." Small sizes of these beautiful flowering trees can be used to obtain a massed effect at low cost, but which in a few years will make as effective a planting as the larger sizes for more immediate effect.

A Few Shade Tree Bargains

THE market for shade trees adapted to street and avenue planting has been for the past few years enormously understocked. Most varieties are not available in the best sizes at any price. It is at the time of preparing this note still too early to make accurate grade counts of stock available (August 1), but in some cases we can indicate the general price schedule.

In the three varieties listed below we will, however, have exceptional bargains to offer. Write us for quotation on your needs. Also, we offer for the private and municipal nursery all varieties in small sizes for growing on. These are listed in the back of this book.

Oriental Plane

A fine narrow street variety, for its dense neat head. Stands city smoke and gas better than most.

18 to 24 ins. 8.00 6 to 8 ft. 100.00 8 to 10 ft. 125.00

These are exceptional prices. Also available in sizes up to 2 inch caliper.

Norway Maple

The best and most popular street tree for all parts of the country. Compact rounded top.

| | (100) | (1000) |
|------------------------|--------|---------|
| 12 to 18 inches S | 10.00 | 70.00 |
| 4 to 5 feet X whips | 50.00 | 365.00 |
| 1½ to 2 inches caliper | 450.00 | 4000.00 |

American Elm

The first citizen of America's Tree world. Fine spreading top and graceful form. Ideal for broad avenues.

| 12 | to | 18 | inches | 2.00 | 10.00 |
|----|----|----|--------|-------|--------|
| 3 | to | 4 | feet | 6.00 | 32.00 |
| 6 | to | 8 | feet | 70.00 | 675.00 |

Sizes available at good prices up to 2 inches or more in caliper

Grow Your Own Shrubs

SHRUBS grow quickly. A lining-out size as listed in the green price list at the back at 4c to 6c will in two years be a thrifty specimen plant, worth ten times as much. For those with large areas to be planted the saving is enormous. Moreover, small shrubs grow readily set out in their permanent positions. require no particular care and are very satisfactory things to plant in small sizes. Before planting, they should be cut down to within two or three inches of the ground. Failure to do this promotes a slower growth and spindling shape.

Trees and Shrubs for Bird Food

The following list of hardy fruit-bearing shrubs for food for birds will be found convenient for ready reference. It embraces the best varieties that can now be furnished in The numbers following the bird quantity. names refer to the numbered plants as below. Prices are listed in the green folder.

Game Birds

Here are Hurry-Trees

OUITE often occasions arise which call for the very fastest growth possible— a quick screen to shut out an unsightly view. something to hold in a steep bank from washing out, thousand circumstances arise every season. Now there are a few trees whose rate of growth is so phenomenal as to pass all other varieties. Growths of three to five feet a year are

Chinese Elm

quite possible. No actual figures are given for the varieties below, since this growth depends on circumstances. They are, however, without exception, the fastest of the desirable species.

Chinese Elm (Ulmus Pumila)

A new variety introduced by Dr. Wilson of the Arnold Arboretum. It has been proved hardy from Texas to Cape Cod. It can be shipped with dry roots. It thrives in dry locations. The photograph above is of a tree that seven years ago was seed. It must not be planted however in wet heavy land, if quick growth is desired.

| | | | | (10) | (100) | (1000) |
|----|----|----|--------------|-------|-------|--------|
| 19 | +a | 10 | inches | (10) | 9.00 | 65.00 |
| | | | | | 0.00 | |
| 3 | to | 4 | feet | | 20.00 | 140.00 |
| 4 | to | 5 | feet X whips | | 60.00 | 500.00 |
| 6 | to | 8 | feet | 20.00 | | |

Lombardy Poplar

A narrow column of light green, picturesque and effective. Grows at maturity forty or fifty feet.

| 3 | to | 4 | feet | | 10.00 | 60.00 |
|----|----|----|------|----------|-------|--------|
| 8 | to | 10 | feet | 6.00 | 50.00 | 450.00 |
| 10 | to | 12 | feet | 8.00 | 75.00 | |

Tulip Poplar (Liriodendron)

A beautiful native tree, too little used, because of the difficulty of moving large sizes. Smaller sizes can be handled with ease.

| 2 | to | 3 | feet | 4.00 | 35.00 |
|----|----|----|----------|----------|-------|
| 18 | to | 24 | inches X | 8.00 | 70.00 |

Lining-Out Grade

THE inside pages of the folder pasted in the back cover opposite contain our up-to-date list of seedlings and small transplanted sizes of evergreens, evergreen shrubs, deciduous trees and deciduous shrubs. These are ideal for lining-out in nurseries or in gardens and will grow into specimen trees if properly taken care of. The value will then be many times the present cost and whether the trees are used for re-sale to others or to be placed on your own estate, it is the most economical way of securing planting material.

Varieties for Special Soils

For special soil conditions we would recommend the following varieties:

Light Sand

Scotch Pine (Pinus) Black Locust (Robinia) Carolina Poplar (Populus)

Sandy Loam

Red Pine (Pinus)
Black Lecust (Robinia)
Carolina Poplar (Populus)
European Larch (Larix)
Arbor Vitae (Thuya Occ.)
Douglas Fir (Pseudotsuga)

Good Soil

White Pine (Pinus) Norway Spruce (Picea) White Ash (Fraxinus) European Larch (Larix)

Coarse Gravel

Red Pine (Pinus) Black Locust (Robinia)

Loam

White Pine (Pinus) Norway Spruce (Picea) White Ash (Fraxinus) Carolina Poplar (Populus) European Larch (Larix) Arbor Vitae (Thuya)

Wet Land

Balsam Fir (Abies) Arbor Vitae (Thuya Occidentalis) Carolina Poplar (Populus)

Christmas Tree Growing

This is particularly profitable in connection with a forest planting for pulp. Plant 3 x 3 feet—about 4,850 trees to the acre. At the end of approximately ten years take out every other tree for sale as Christmas trees, and leaving your planting 6 x 6 feet—the best distance for good timber growth. The best Christmas tree varieties are White and Norway Spruce and Douglas and Balsam Fir. These varieties are mature for Christmas tree cutting in 7 to 10 years from a 3-year-old transplant.
